

SURVIVAL OF MANKIND WHAT COST?

The world is running a Mad Race for
NUCLEAR PROGRESS

The danger of
NUCLEAR DISASTER
&
DESTRUCTION OF MANKIND

EXR 23/6/81

is looming large on the world

All the so-called NUCLEAR progress and Space Conquest has only **MULTIPLIED PROBLEMS** of Mankind but has not brought any solution to the world's urgent and basic problems a bit nearer. It has no significance to and has no impact on the **COMMON MAN**.

OUT OF THIS NUCLEAR & SPACE AGE
there arose a Young, Bold and Rare Personality in India

Mr. SANJAY GANDHI,

Who had simplistic solutions with his boy's scout precepts and a pragmatic approach like small family, planting of trees, raising of national output, eradication of dowry etc. under his **FIVE POINT PROGRAMME**.

But, ALAS, his life was tragically cut short-we could not honour him in his life-time, his mission remains to be fulfilled by posterity.

ON THIS FIRST DEATH ANNIVERSARY OF LATE SHRI SANJAY GANDHI

Let us pay our humble respects and homage
to his memory and RESOLVE to carry forward his mission to

make **INDIA THE BIRTH-PLACE OF
PRACTICAL IDEAS AND SIMPLE SOLUTIONS**

to problems
threatening the survival of mankind
